

DANIEL LE

Senior Full Stack Developer (Java, Node.js)

daniel0872717@gmail.com • linkedin.com/in/daniel0309 • superdaniel0406.github.io • Krakow, Lodz, Poland
• Language : English

Summary

Experienced senior full-stack developer proficient in Java and Node.js development. Skilled in frontend development with React and Angular. Good at problem-solving and meticulous attention to detail. Thrives in early-stage startup environments and fast-paced settings, eager to demonstrate expertise and drive company growth.

Skills

React · Angular · NextJS · Web3 · Node.js · Nest.js · Spring Framework · SQL · NoSQL · AWS · Docker · Kubernetes · Jira · Jenkins · Cypress · Selenium · Test Driven Development(TDD) · GraphQL

Strengths

Meticulous

Sharp ability to detect and resolve even the most minute coding issues.

Problem-Solving

Discovered bugs and potential issues, then promptly resolved them.

Collaboration

Worked collaboratively with interdisciplinary teams and facilitated code reviews.

Experience

Workvivo

Cork, Ireland

Senior Full Stack Developer

11/2020 - 04/2024

Workvivo is an employee communication platform that helps businesses connect with their staff across multiple sites

- Utilized proficiency in Nest and Next to develop customized Workvivo solutions for clients in the Information Technology and Healthcare sectors, meeting their unique requirements
- Collaborated with client stakeholders and UI designers to gather requirements and implement solutions
- Implemented the company's internal dashboard system using Spring, Angular, and Oracle DB, resulting in enhanced performance and efficiency for business operations and decision-making processes
- Implemented scalable solutions on AWS (Amazon Web Services) cloud infrastructure, utilizing services such as EC2, S3, Lambda, and RDS to optimize application deployment, scalability, and reliability
- Implemented CI/CD (Continuous Integration/Continuous Deployment) pipelines using AWS CodePipeline and other DevOps tools, automating build, test, and deployment processes to achieve faster release cycles and improved software quality
- Participated in code reviews, provided constructive feedback, and ensured adherence to coding standards, fostering a collaborative and quality-focused development environment

BitsRain

Spring Field, MA, United States

Senior Full Stack Developer

04/2020 - 10/2020

BitsRain is a dynamic team of creative minds and technical experts, united by a passion for innovation. With a deep understanding of the digital landscape, BitsRain strives to provide cutting-edge solutions that refine industries

- Developed robust and scalable backend systems using Node.js and Amazon S3 buckets, and implemented a microservices architecture
- Created the admin dashboard frontend applications using Typescript and React, ensuring efficient administrative functionality
- Actively engaged in all phases of the Agile Software Development Life Cycle, leveraging tools like Jira and Confluence for project management and documentation
- Conducted code reviews, performed unit testing, and implemented continuous integration and deployment (CI/CD) pipelines to ensure code quality and reliability
- Provided mentorship to junior developers to elevate their proficiency in Test-Driven Development (TDD)

Experience

GoContractor

Dublin, Ireland

Full Stack Developer

05/2015 - 03/2020

GoContractor is a leading provider of contractor management software specifically tailored for heavy industry

- Worked closely with a senior developer to understand project requirements and create a codebase that adheres to industry standards, scalability, and maintainability best practices
- Contributed to the migration of the development system from PHP to Spring Boot and React, implementing a microservices architecture that significantly improved user engagement, system scalability, and customizability
- Engaged in daily standup meetings and participated in code reviews
- Applied test-driven development best practices during development, ensuring high-quality and bug-free code
- Proven proficiency in diagnosing and resolving technical issues, adeptly troubleshooting and debugging to maintain seamless functionality of applications in production settings

Education

Dublin City University

Dublin, Ireland

Master's degree in Computer Science

06/2014 - 04/2015

Dublin City University

Dublin, Ireland

Bachelor's degree in Computer Science

09/2010 - 05/2014
